ABOUT ME

100+ websites designed and launched, now building web applications as a Frontend Developer. I work with Angular, React and TypeScript, and my design background shapes how I code: I pay attention to the details that make an interface work, and I collaborate comfortably with both design and development teams.

TOOLS & SKILLS

Frontend: HTML5, CSS3, JavaScript, TypeScript & Tailwind - Angular & React

Backend: Java, Spring Boot - REST APIs

Git & GitHub

Diseño: Figma, Adobe Creative Cloud (Photoshop, Illustrator, InDesign y After Effects)

PROFESIONAL EXPERIENCE

Web Designer – SIWEB (Jul 2024 – Jun 2026)

- Designed and launched 100+ websites for freelancers and small businesses across sectors such as construction, wellness, beauty and healthcare, from visual direction to production release.
- Defined each site's visual system (color palette, typography and button styles) tailored to each client's brand.
- Managed end-to-end deployment: domain purchase, DNS configuration to point to company servers, and SSL certificate setup.
- Applied on-page SEO best practices and set up Google Search Console and Google Analytics for each domain.
- Worked directly with each client to tailor content and legal pages to their business before launch.

Frontend Developer Intern – SIWEB (Feb 2026 – Mar 2026)

- Implemented a template feature within the existing codebase of an AI-powered app that generated social media posts, working on a dedicated branch in the team's repository.
- Designed the templates as reusable structures with variable slots, so each client's logo, color palette and typography were injected dynamically and a single design produced on-brand assets for any visual identity, using a Figma → code → AI refinement workflow that delivered up to 5 templates per day.
- Designed and developed a landing page with a booking system in React and Tailwind CSS, on a Node.js backend with a Supabase database, from Figma design to implementation.

Graphic Designer – Cen Palabras Marketing & Advertising (Mar 2019 – Jun 2020)

- Built complete brand identities and visual systems for a range of clients, ensuring visual consistency across digital and print media.
- Designed custom websites and a wide range of marketing and commercial communication materials, including e-books, catalogues, corporate presentations, billboards and social media campaigns.
- Created conversion-focused digital ad creatives and social media content, aligning visual assets with each client's campaign strategy and objectives.
- Delivered professional photography, advanced image editing and digital retouching in Adobe Photoshop, preparing optimised assets for print and web.

EDUCATION

- Higher National Diploma (HND) in **Web Application Development** | 2024 – 2026
- Higher National Diploma (HND) in **Advertising Graphic Design** | 2017 – 2019
